INNOVATE

STAND OUT FROM YOUR COMPETITION

Distinguish yourself from competitors by reducing damages, integrating with APIs, streamlining processes and offering more data with Utilocate. Our software provides powerful AI insights into damages and elevated risks. Here are 3 simple things we do differently to help you stand out.

QUICK TICKETS

RISK MANAGEMENT

TEAM MORALE

Enhance dig safety, and reliability with the most comprehensive 811 locate ticket management system on the market today! Tickets have never been so easy.

We leverage years of data across utilities, to enhance our AI. This allows you to make informed decisions and know when you're taking risks.

Utilocate is easy to use, this means locators:
· enjoy using it
· locate more accurately
· are less fatigued
· are more independent

WE ARE DRIVEN BY OUR COMMITMENT TO PROTECT LIVES & CRITICAL INFRASTRUCTURE BY IMPROVING THE LOCATE PROCESS

AUTOMATED INTELLIGENCE

Stop incidents before they happen with AI. Our system identifies high-risk digs and then promotes interventions to stop incidents that damage assets, threaten reliability, and endanger worker safety. Utilocate can review all of your One Call tickets / private projects and signal which of them are most risky for underground utility damages, helping you to make informed decisions.

BUSINESS INTELLIGENCE

Risk-based ticket management is where we use leading indicators to identify where excavations are not reported, so you know where to go without 811 / One Call tickets. We analyze the micro-areas within your service territory for the excavators that are least likely to contact 811 and the areas with the highest volume of construction activity, so you don't have to guess.

SIMPLICITY

Our UI/UX approach is simplicity first. Our tools are powerful but we've made them accessible so that even novices can create and complete accurate locate tickets. Plus our user guide and learning center makes it possible to learn quickly.

TRACEABILITY

If there's a utility strike and something does go wrong, it is imperative that you find out what has happened and if it was your fault! We've created tools so that you can easily find old locates, view their contents and allign with other locates in the area.

QUICK FACTS

+ 2.2m

COMPLETED
LOCATES / YR

Last year Utilocate handled over 2.2 million completed locates across North America. Our software is powerful and easily scaleable.

+ >100

SATISFIED
CLIENTS

Our customer retention rate is over 98% and we're honored that so many LSPs, Excavators, Utility Owners and Municipalities have trusted us!

+ 1
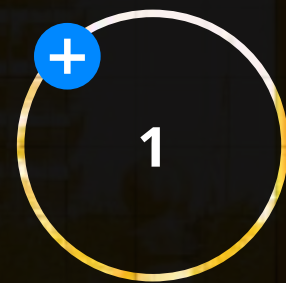

SOLUTION FOR
EVERYTHING

Utilocate provides you with everything you need to speed up your locates in the field and automate clears with precision and confidence.

LOCATING SUCCESS
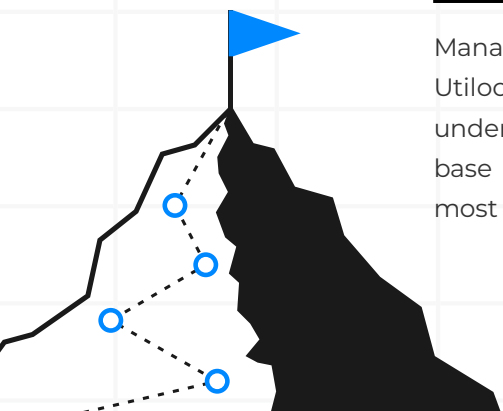

Managing tickets is only part of what Utilocate does. The real magic lies underneath. We've parlayed our code base and historical data to build the most comprehensive locate ticket management system on the market! We're on a mission to help you reduce damages. Plus our intuitive UI/UX means you can complete tickets faster & more acurately than ever before!

PRODUCTIVITY TOOLS

WE ARE DRIVEN BY CREATING SOFTWARE THAT DELIVERS RESULTS FOR YOUR TEAM & FOR YOUR BUSINESS

MUNCIPALITIES, UTILITIES, AND LOCATORS, TAP INTO UTILOCATE'S ASSET MANAGEMENT, LOCATE TICKET & WORK ORDER MANAGEMENT SYSTEM, TO BETTER MANAGE THEIR ASSETS, TRACK WORK, OPTIMIZE SPACE, AND LOCATE SMARTER.

DISPATCH
Get an overview of your locators and their workload with our purpose built dispatch profile

ROUTING
AI-optimized routing means your locators can do more locates than before, while using less gas

AUTOMATIONS
Advanced automations speed up locate processes and reduce potential damages

SUGGESTIONS
Utilocate will suggest smart improvements by leveraging historical and current data

MAPPING
Geo-spatial integrations are at the foundation of Utilocate including ESRI & Google Maps

SCHEDULER
Schedule and reschedule locates so that your locating team can stay dynamic

USER ROLES
Assign and configure user roles with our User Manager. This gives greater control over your team

TICKETS
Create, manage and sort through tickets with ease! You can view tickets in a list or on the map

**WE'VE BEEN IN BUSINESS FOR 26 YEARS**

DIGITIZING WORKFLOWS

Current workflows are not only inefficient and expensive, but also prone to errors. They entail a lot of manual steps and multiple distinct parties, which often leads to loose ends. Because this method of data collecting is so unreliable, a great deal of discussion and explanation is necessary. The as-built documentation - normally takes between 20 and 90 days. Despite all of that effort and time, asset documentation is frequently inaccurate.

Even with the use of digital tools and mapping equipment, there are still restrictions to integrating outdated systems into a contemporary organisational environment. These older apps are sometimes large, stand-alone instruments that require specialized expertise and training to use properly. Furthermore, most locators can only make changes to the data capture catalogue, which might result in time-consuming data readjustments.

To address these difficulties, there is a pressing need for a solution that would enable utilities and their contractors to locate and record their assets in a timely and effective manner; **Utilocate is that solution!**
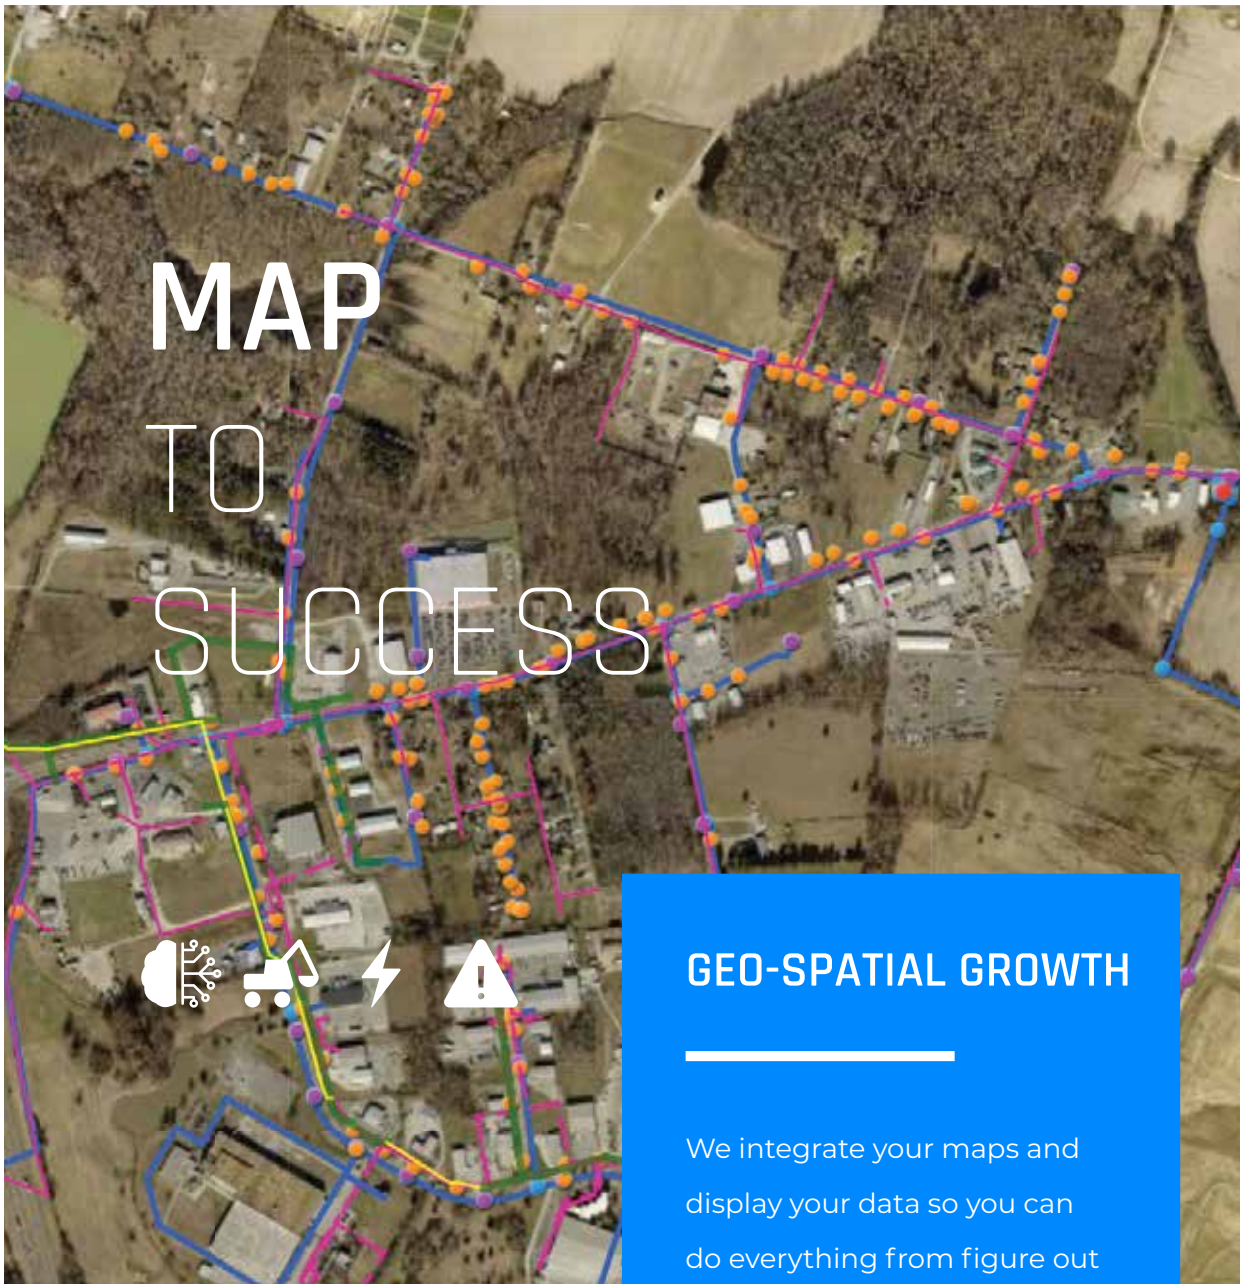

MAP
TO
SUCCESS

GEO-SPATIAL GROWTH

We integrate your maps and display your data so you can do everything from figure out routing to reassinging tickets. Seeing your data is essential to 811 ticket management!

Utilocate allows you to connect your mapping systems like ESRI and display ticket, locator and routing information on the map. This makes it easier for office staff to solve problems, address emergencies, figure out bottle necks and visualize data.

Seeing tickets on the map view and then connecting that data in the field for damage prevention technicians is more efficient and will ultimately lead to increased efficiencies and improve communication between teams.
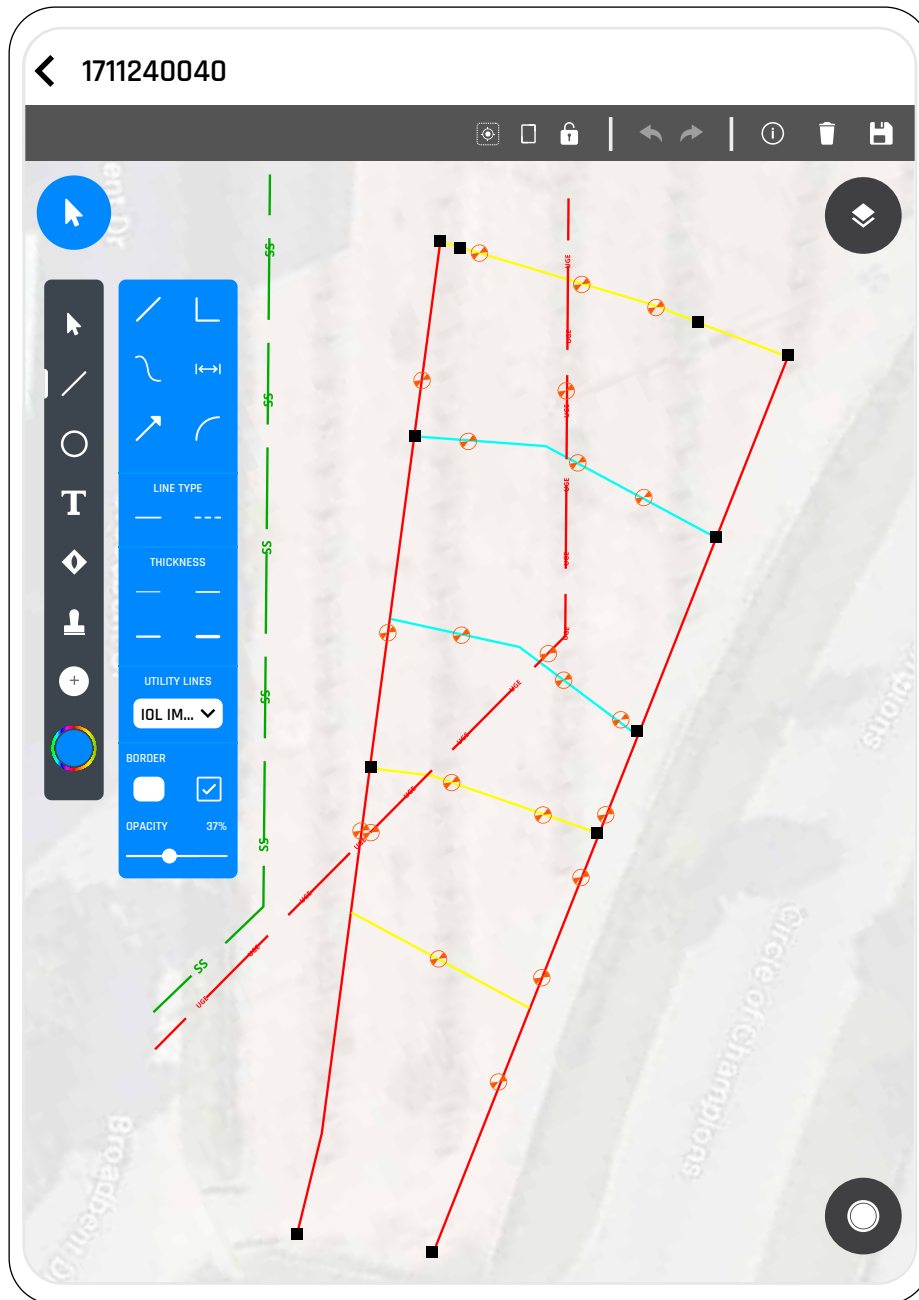

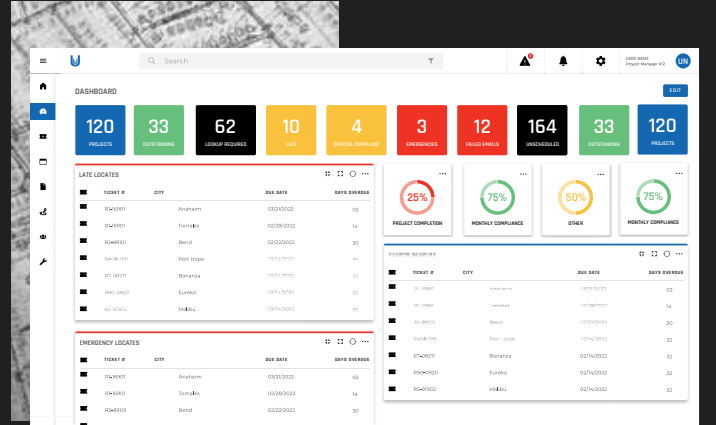

Our advanced vector map sketch tool empowers users to meticulously document utility locations and meticulously annotate maps, seamlessly integrating this crucial information into a dedicated map layer. This streamlined process ensures that future locators have easy access to the recorded data, facilitating efficient inspections and expediting damage investigations. Renowned for its intuitive interface and swift functionality, this tool is equally adept in both public and private locating endeavors, ultimately enhancing the quality and accuracy of your deliverables.
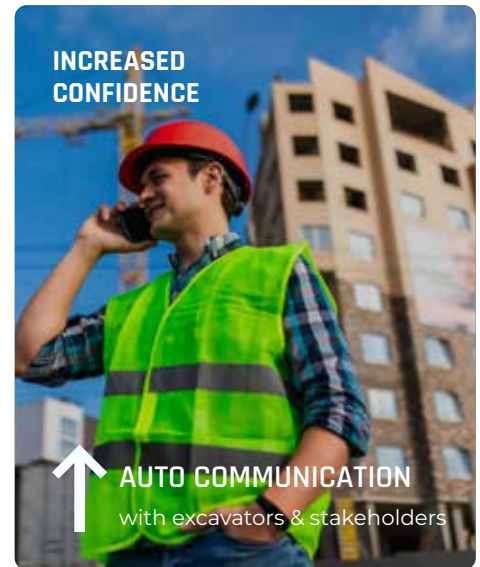

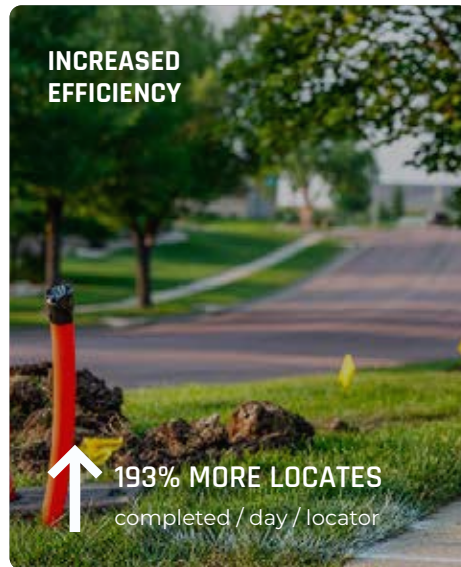

ON THE SPOT UTILITY RESOURCES LLC

Going digital in the field

Using the Utilocate app, On The Spot Utility Resources were able to dramatically increase compliance, drive efficiency and improve documentation of locates.

RESULTS

COMPANY GROWTH
